

Project update – Barangaroo Station

March 2024

Sydney Metro is Australia's biggest public transport project

Services started in May 2019 in the city's North West, with a train every four minutes in the peak. Metro rail will be extended into the CBD in 2024, with new CBD metro railway stations at Crows Nest, Victoria Cross, Barangaroo, Martin Place, Pitt Street and Waterloo and new metro platforms at Central and then onto Bankstown in 2025.

BESIX Watpac is building Barangaroo Station, including the station fit-out, associated landscaping and civil works, and the realignment of Hickson Road.

Systems Connect (an unincorporated joint venture between CPB Contractors and UGL Limited) is delivering line-wide work, which includes installing metro rail track, power systems, communications, and infrastructure to turn the excavated tunnels into a working railway between Chatswood and Sydenham.

The Trains, Systems, Operations & Maintenance (TSOM) group is delivering the communication and signalling systems, and the platform screen door installation.

Barangaroo Station – upcoming work

In March, ad hoc single lane road closures along Hickson Road will be in place during work to install topsoil to tree pits and bollards adjacent to Hickson Road.

Out-of-hours work will occur for one night only so Jemena Gas can connect gas infrastructure under Dalgety Bridge and on Windmill Street. **We will provide details of this work via notification and in our weekly e-news and properties impacted by a temporary overnight interruption to their gas supply will be notified separately by Jemena Gas.**

Work to construct the final Hickson Road alignment under the Dalgety and Windmill Street bridges will continue throughout March and will be intermittently noisy. This work will include the construction of the final road alignment, pedestrian footpaths, coach parking and bus stops.

Landscaping along the foreshore, in front of the Cutaway and around the station entrances will continue. You can access information about the work on the public domain via the Sydney Metro Barangaroo Station webpage under quick links (<https://www.sydneymetro.info/station/barangaroo-station>).

On 29 February work will start to re-line the seawater pipes at Headland Park. Divers are undertaking this work from a barge in the harbour. The divers will also be in boats out on the harbour for environmental monitoring purposes which will involve the use of a drone. Neither of these activities will impact the community's use of Headland Park.

Underground, the team will continue its focus on testing and commissioning equipment in the plant rooms. In the tunnels, Systems Connect and the TSOM group will continue with the tunnel fit-out, including testing and commissioning of electrical services. TSOM will continue dynamic testing of the trains through the tunnels and testing and commissioning field equipment throughout the station, including speakers, cameras and door security.

For any prolonged noisy work, respite periods will be in place on weekdays from 9.30am - 10.30am and 12.30pm - 1.30pm. On Saturdays, work will commence at 8am and end at either 1pm without respite periods or 6pm with respite periods in line with the weekday arrangements.

In addition to the respite hours, the team will use the available methods to reduce noise impacts on the local community. Noise reduction techniques include:

- limiting the use of multiple pieces of loud machinery at the same time and location, where feasible
- turning off equipment when not in use
- using non-tonal reversing alarms on all equipment
- installing temporary noise blankets around the noise source, where feasible
- and operating equipment on the lowest effective vibration setting, where feasible.

The table below provides more information about the activities, weather and site conditions permitting.

Location	Activities during standard construction hours
Hickson Road (between Windmill Street Bridge and High Steps) and the public domain around Nawi Cove and at Headland Park	<ul style="list-style-type: none"> • To install topsoil in tree pits and bollards adjacent to Hickson Road, an ad hoc single lane road closure along Hickson Road will be in place between High Steps and 25 Hickson Road. • Continuing to construct the final Hickson Road alignment under Dalgety Bridge, including constructing kerbs and laying asphalt. • Excavation to the western side of the new road alignment (between High Steps and 25 Hickson Rd) to allow for landscaping works. • Continuing station bollard and footing installation. • Continuing high-level planter box construction on pods, including the installation of scaffolding. • Commencing work to remove the redundant services, mesh and anchors attached to the heritage wall. This work may require a partial footpath closure on the western side of High Street, which will be notified in advance if needed. • Finalising landscaping work in front of the Cutaway. • Landscaping work along the foreshore and around the station entrances, including pavement construction. • Preparing to switch pedestrians to newly built footpath along the Nawi Cove foreshore. • Installing signage and light pole footings. • Installing tree support structures ahead of paving works. • Commencing the installation of the landscape precast seat. • Continuing work to re-line the seawater pipes at Headland Park. This work will be undertaken by divers working from a barge in the harbour. • Environmental monitoring by divers in boats on the harbour, at times using a drone. • Delivering building materials and equipment for the station and tunnels.
Inside the station box and tunnels	<ul style="list-style-type: none"> • Fit-out and testing of station equipment rooms. • Dynamic train testing through the tunnels. • Testing and commissioning activities of electrical services, including track, power, and communications and signalling equipment and systems.

- Testing and commissioning of the platform screen doors and field communications equipment.
- Installing cables and passenger information display screens.
- Installing equipment, cables and terminations through the station.

Location

Out-of-hours work activities

Specific details on all out-of-hours work occurring at the surface have or will be individually notified and provided in our weekly e-news.

Between 25 Hickson Road and Towns Place

- For one night only, Jemena Gas will connect gas infrastructure within the Sydney Metro site under the Dalgety and Windmill Street bridges and on Windmill Street. **Properties impacted by a temporary overnight interruption to their gas supply will be notified separately by Jemena Gas.**

Inside the station box and tunnels

- 24/7 access to tunnels (as required).
- Testing, maintenance, and commissioning for mechanical and electrical services, including power, communications and signalling equipment and services, ventilation systems and dynamic train testing through the tunnels.

Barangaroo Station work area with pedestrian detours during standard construction hours

No pedestrian access along the heritage wall below High Street during construction

Pedestrian access on Hickson Road along the heritage wall remains closed during the construction of Barangaroo Station. Alternative access is available via the High Steps, Wulugul Walk or Kent Street for those requiring an accessible route (via lifts from Hickson Road at Barangaroo to Kent Street, and lifts at Headland Park).

For maps of out-of-hours work, please refer to the specific notifications in the '**Construction updates**' tab at <https://www.sydneymetro.info/station/barangaroo-station>.

Thank you for your patience while we complete this essential work

If you are affected by our construction, and have any questions or complaints, please contact the BESIX Watpac Community Engagement Team on **1800 171 386** (24-hour community information line) or email barangaroometrostation@transport.nsw.gov.au. You can subscribe to receive this monthly notification and weekly updates by email at: www.sydneymetro.info/station/barangaroo-station
